Cafeteria Menu Display System

Introduction

In many colleges and institutions, daily menus are still manually updated...

Cafeteria Menu Display System

Objectives

- To provide an easy interface...

- To allow categorized display...

- To implement admin login...

- To reduce manual errors...

- To promote a digital solution...

Objectives

Cafeteria Menu Display System

System Requirements

Hardware:

- Laptop/Desktop with at least 4 GB RAM

- Internet browser

Software:

- Python 3.10+

- Streamlit

- VS Code

- JSON file

Cafeteria Menu Display System

Technologies Used

- Python

- Streamlit- JSON

- VS Code

- GitHub

Cafeteria Menu Display System

System Architecture & Design

Admin Login -> Menu Dashboard -> Add/Delete Items -> Update JSON -> Display Menu

Cafeteria Menu Display System

Features

- Secure Admin Login

- Menu Display by day and category

- Add/Delete Items

- JSON storage

- Auto-refresh

- Simple UI

Screenshots

Screenshots of the UI in action.

Limitations and Future Scope

Limitations:

- No DB integration

- Not online

- No role separation

Future Scope:

- Firebase/MongoDB

- Online deploy

- Image support

- Mobile version

Conclusion & References

The system solves menu management by digitizing it.
